

## MEDIA RELEASE

### **Orient Capital teams with global financial data provider FactSet**

#### ***Collaboration makes it easier for listed companies to access broker data and research reports***

**19 July 2017:** Orient Capital, the investor relations division of Link Group (ASX: LNK), has today announced that it is teaming with FactSet, a global provider of integrated financial information, analytical applications, and industry-leading services.

The relationship expands the breadth of financial data readily available to listed companies from Orient Capital's online platform, *miraqle*, and answers the demand to have a 'one stop shop' for their investor relations needs.

Through the integration, Orient Capital will add FactSet broker research and estimates to its online reporting platform *miraqle*. *miraqle* is used by hundreds of listed companies globally to manage their relationships with investors, potential investors, and the wider investment community.

This means listed companies will now have streamlined access to review comprehensive earnings estimates and analyst recommendations sourced from the FactSet Estimates database, which has over 800 contributing brokers globally covering more than 16,000 companies.

This new addition complements *miraqle*'s existing suite of integrated modules, which allows its client base of listed companies across the globe access to market data, ownership analysis, a global investor database, contact management and communication tools, as well as other external datasets, such as FactSet.

Link Group's Corporate Markets CEO Paul Gardiner said, "We are pleased to work with FactSet, as this combination offers an easy way for clients to source and aggregate different broker estimates using *miraqle* as a single, automated solution."

#### **Strategic partnership approach**

Today's announcement follows the recently-formed partnerships between Link Group and fintech hub Stone&Chalk, technology solutions provider Moneysoft, and online document service DocuSign. Link Group's partnership strategy demonstrates its commitment to offering the latest and most innovative digital and technology solutions to its growing client base.

“Link Group, and the Orient Capital team, are committed to exploring new innovations and partnering with companies that provide technology-enabled solutions to our clients. We are confident this new partnership will make managing investor relations a smoother process,” concluded Mr Gardiner.

**Ends**
